Radiant Renewal

Our most hydrating facial begins with a manual citrus oil microderm-abrasion to retexture the skin leaving it silky smooth. A mask of detoxifying clay and a combination of 45 different crystals and gemstones re-aligns the water molecules to effectively absorb and retain hydration. To enhance this hydration a fresh aloe, cucumber and mineral mask will follow. We finish with a creamy coconut hibiscus emulsion to leave the skin positively luminous.

FOR THE TWO OF YOU

A special massage for lovers has been developed exclusively for Esperanza. This dance of massage creates a synergy of energy increasing the fire between the two recipients, opening the heart center and increasing circulation. We incorporate specific Thai techniques and acupressure into a flowing massage which strengthens the organs and sexual chi. This session has been created for all of our couples treatments with the exception of Romancing the Stone. In the middle of any massage 90 minutes or longer, our therapists will ask you if you would like to trade therapists. In doing so, the therapists will bring the essence of one heart to another through thought and energy work.

Pasion de la Noche

This multi-layered event begins in the spa grotto in the late evening when the spa is quiet. You have the privacy to be together in the steam cave, the warm pools and to receive your massage under the stars. While you are at the spa, your hotel casita will be set up with sensual finger foods, your choice of drinks and blended oils prepared for the two of you to fortify your love and enhance your romance.
